Projects

Full-Stack Urban Traffic Prediction Platform

Python, HTML, CSS, JavaScript, Pandas, NumPy, scikit-learn

January 2026

Montreal, Canada

- Built an end-to-end traffic prediction system with feature engineering, ML training, and deployment, evaluated using MAE, RMSE, R^2 , and cross-validation.
- Designed and deployed a production-ready ML pipeline and FastAPI service delivering real-time, interpretable predictions.

Tariff Management System (COMP 249 Final Assignment)

Java, File I/O, Data Structures, Object-Oriented Programming

April 2025

Montreal, Canada

- Built a Java-based tariff management system using File I/O to process trade data, apply rules, and generate structured outputs.
- Applied object-oriented design to implement custom data structures and business logic for trade evaluation.

Professional Experience

Sales Representative

Bravada Technologies

July 2024 – Present

Montreal, Canada

- Delivered consultative sales support by explaining technical features, contracts, and pricing to non-technical customers.
- Managed end-to-end sales workflows including onboarding, account updates, and after-sales support.

Marketing Coordinator

OSL Bell Canada

Feb 2024 – June 2024

Montreal, Canada

- Strengthened relationships with key investors, contributing to business growth.
- Supported performance reviews and improvements to marketing and sales strategies.
